Profile

Highly skilled Front-End Developer with almost one year of work experience in developing and building web applications, capabilities to produce projects that exceed user expectations, utilizing version control systems, and staying up-to-date on emerging web technologies.

Education

Helwan University

Bachelor of Computer Science

October 2019 – June 2023

Cairo, Egypt

Experience

Camp Coding

Front End Developer

October 2023 – Present

Tanta, Egypt

- Collaborate with a team of designers and backend developers to achieve the goals and requirements of each project.
- Modifying previously implemented projects upon request and adding all the new modifications with high efficiency.
- Created multiple responsive web applications for mobiles and desktops using React.js and Next.js as well as using HTML, CSS and JavaScript (Vanilla JavaScript).
- Utilizing version control systems such as GitHub for the team to have access to the code of any project.
- Working with clients as we created many projects for clients and startup companies and businesses.

Projects

My Portfolio / *HTML, CSS, Bootstrap, JavaScript*

- My personal website contains all information about me, my projects, my work experience and links to all my accounts
- Used Vanilla JavaScript only without any frameworks and used bootstrap and CSS for styling and to make it responsive.
- Created day and night modes.

E-commerce / *React.js, Redux*

- One of my first projects to learn React, it is well organized with a clean code and used many libraries as well.
- Used a token authentication (JWT) so you can only have access with the given username and password.
- Used APIs from dummyJSON website and Redux toolkit to fetch the data and store it.

Quiz App / *React.js, Redux, MUI*

- Little advanced quiz app as you can choose the subject of the quiz, the difficulty level and the number of questions.
- Used APIs from Trivia DB, Redux toolkit to manage the state and used a custom hook for the API requests.
- Used Material UI for the design and few CSS.

To-Do App / *React.js*

- Used local storage to store the to-dos with all the crud operations as you can add, edit and delete.

Movies website / *Next.js*

- Used APIs from TMDB, a good responsive design provides all the details of every movie and show.

Skills
