Projects

My Portfolio / *HTML, CSS, Bootstrap, JavaScript*   *View website*
- My personal website contains all information about me, my projects, my work experience and links to all my accounts
- Used pure JavaScript without any frameworks, created day and night modes, and used bootstrap and CSS for styling.

E-commerce / *React.js, Redux*   *View website*
- Used APIs from dummyJSON website, Redux toolkit to fetch the data and store it, and bootstrap and CSS for styling.
- Used a token authentication (JWT) so you can only have access with the given username and password.

Quiz app / *React.js, Redux, MUI*   *View website*
- Little advanced quiz app as you can choose the subject of the quiz, the difficulty level and the number of questions.
- Used APIs from Trivia DB, Redux toolkit to manage the state and used a custom hook for the API requests.

Cars website / *Next.js, TypeScript, Tailwind*   *View website*
- Used APIs from RapidAPI and API Ninjas, provides all the details about available rental cars and the price per day.
- Used server-side search and filtrations. Used Headless UI and Tailwind CSS for styling

Movies website / *Next.js*   *View website*
- Used APIs from TMDB, well designed with pagination and search provides all the details of every movie and show.

To-Do app / *React.js*   *View website*
- Used the local storage to store the to-dos Using all the crud operations as you can add, edit and delete.
